RESEARCH INTERESTS

Networked systems, Distributed systems, Data center networking, LLMs for networking and systems

EDUCATION

Ph.D. in Computer Science, **Korea University**, South Korea Mar. 2012 - Feb. 2020

- Dissertation: Buffer Sharing Mechanisms for Data Center Networks

- Advisor: Prof. Wonjun Lee

B.S. in Computer Science, **Korea University**, South Korea Mar. 2008 - Feb. 2012

- Interdisciplinary major: Brain and Cognitive Sciences

Exchange Student, **Lund University**, Sweden Jan. 2011 - Jun. 2011

EMPLOYMENT HISTORY

Assistant Professor, Dept. of Computer Eng., Sungshin Women's University Mar. 2022 - Present

Research Professor, Future Network Center, Korea University Mar. 2020 - Mar. 2022

Lecturer, Department of Information Security, Seoul Women's University Mar. 2021 - Aug. 2022

Lecturer, School of Cybersecurity, Korea University Sept. 2019 - Feb. 2020

REMARKS

During my undergraduate, I developed KLUE (Korea University Lecture Evaluation, <http://klue.kr>), a lecture rating service for Korea University. In 2025, KLUE has 500K+ evaluation data and 60K+ members. Most students at Korea University use this service.

- Brief history: In Feb. 2010, upon the request of the 43rd Student Council, three KWEB student club members (including me) began a development project. Our team was in charge of the whole planning and development. The service was run by the student council as planned. However, in November 2010, the service was terminated provisionally due to an incident in which the student council violated the personal information handling policy. In January 2011, I revived the service and became the president. The 44-46th Student Councils supported server costs until we achieved financial self-sufficiency. I ran the service until February 2015. Since March 2015, KLUE has been run by KWEB members. (<https://kwebofficial.com/>). My experience developing and operating KLUE led me to explore networked systems during my Ph.D. journey.
